SUMMER 2022

# THE COLLECTION

The collection is inspired by the ocean, the coral reef and their colors. Unfortunately, due to climate change, coral reefs are suffering from bleaching which is bringing them to death.

For this reason, the colors of the collection are deliberately bright; the patterns feature coral shapes and the graphics outline the synergy between North Sails and Coral Gardeners and their effort to restore the underwater habitat.

The fabrics used for this collection are cotton Seacell jersey, Seacell cotton, recycled jersey, organic cotton, pique, recycled chiffon and recycled Lycra.
